Subject: Application for POSTECH Summer Program: Exploring Research Opportunities for Future Career Direction

Dear Members of the Admissions Committee,

I am writing to express my enthusiastic interest in the POSTECH Summer Program. As a dedicated engineering student specializing in computer science at INSA Hauts-De-France, I am eager to explore the world of research and gain hands-on experience in a dynamic and innovative environment.

Throughout my academic journey, my professors have often encouraged me to pursue a PhD, recognizing my potential in research. However, I currently feel uncertain about committing to a research career without further exploration. The POSTECH Summer Program presents a unique opportunity for me to delve into research activities, work alongside esteemed professionals, and better understand whether this path aligns with my long-term goals.

I am particularly drawn to POSTECH's reputation for cutting-edge research and its collaborative international environment. I am especially interested in joining the DPNM lab, as I am passionate about advancing my knowledge in Artificial Intelligence, particularly in the field of Large Language Models (LLMs). I believe that working in this lab will allow me to deepen my understanding of AI technologies and their applications, while also contributing to impactful research projects.

Thank you for considering my application. I am excited about the possibility of contributing to and learning from the POSTECH community. I look forward to the opportunity to discuss how my background and aspirations align with the goals of the program and the DPNM lab.

Emmanuelle Ngan Ha Nguyen
